# European Business Ethics Cases in Context: The Morality of Corporate Decision Making (Issues in Business Ethics)

Business ethics as a discipline leans on cases but flourishes by thorough analysis and reflection. The present volume offers both. After three introductory chapters into business ethics eight recent European cases, mainly stemming from The Netherlands and Belgium and all of them with a clear moral impact, are extensively described and analysed. Among them are the Lernout and Hauspie speech technology disaster, Heinekens struggle with the promotion girls selling beer in Cambodia, cartels in the Dutch construction industry, the pharmaceutical industry and the Aids crisis, and Unilever allegedly making use of child labour in the cotton industry in India. Each case is followed by two expert comments, from the fields of general ethics, but also of law, economics, management and organisation theory, sociology and social psychology. Cases and comments together offer an unique entrance in varieties of moral reasoning and in the personal and institutional dimensions to be taken into account when facing a corporate case saturated with moral ambiguities. This book will beof interest toresearchersas well as teachers of undergraduate and graduate courses in Business Ethics, Business in Society, Management and Organisation Theory and Strategic Management. It will also beuseful for business practitioners eager to find moral guidance in their specific field.
