Excerpt from Psychological Tests: A Bibliography; The Binet-Simon Scale; Other Mental Tests; Classified Bibliography for Vocational Psychology; Supplement to January 1, 1918 (Page 79) The literature of psychological tests, although it has appeared for the most part since 1910, is notwithstanding its recent date very copious and very widely scattered. For this reason it has seemed to us worth while to undertake the preparation of a bibliography covering the entire field, and including as the first of a series of supplements a bibliography of the still more recent subject of pedagogical tests. This bibliography with its supplements will be little more than a catalog of the Psychological and Pedagogical Test Literature contained in the library which is part of the permanent test exhibit of the Bureau of Educational Experiments. Owing to the impossibility of securing foreign periodicals, this part of the work is necessarily incomplete. The Bureau hopes to keep the bibliography up to date by yearly reprints and to insert the foreign material when this becomes possible. Included among the references is the Bibliography of Binet Tests up to 1914, by Samuel Kohs, and the list of vocational test literature from Vocational Psychology by H. L. Hollingworth. To both authors we are greatly indebted. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
